

Instructions for Exeter One-leaf Extension Table

Unpack the table onto a soft level surface and identify the listed items.

Hardware included:

- 1/4" - 20 x 50mm hex bolts (4)
- Allen wrench (1)

Components included:

- Table top assembly with leaf (1)
- Leg base assembly (1)

Exeter one-leaf extension tables:

└ 42" W x 72/96" L x 30" H

Tools required | Philips head screw driver

Step 1: Remove the shipping blocks

Lay the *table top sub-assembly* face down on a soft level surface. Use a Philips head screw driver to remove blocks under the *table top assembly* by detaching all the *flat head screws* from the *shipping blocks* (**Figure 1**). Remove any packing material underneath the table.

Step 2: Install the *leg base assembly*

Install the *leg base* to the *table top assembly* by aligning and inserting each tenon on the leg base into the cutout on the table top assembly. Then slide a $\frac{1}{4}$ " – 20 x 50mm hex bolt into each hole and tighten with the provided Allen wrench to secure the *leg base assembly* to the *table top assembly* (**Figure 2**).

When
in use

How to use the Slide Lock to lock and unlock the table top

To lock the top, push down the small black handle in the middle of the slide arm. To unlock the top, simply push the handle up on both sides. *Lock-up handle* located in the middle of the *slide arm* (**Figure 3**). If you prefer to use Table Lock to operate the table top, please keep this Slide Lock unlocked at all times after initial setup of the table.

Attention

After the table is fully assembled, DO NOT try to pick up the table from the ends – especially if the table is fully extended. Should the table need to be relocated, close the table and carefully lift the table in the middle area where the two tops meet.

Care Instructions

To care for and preserve the finish on your new Copeland Furniture piece, please keep the following recommendations in mind.

- While our furniture has been finished with a durable top coat, the surface may be sensitive to dents and abrasions during the first 30 days in your home.
- Treat the surface finish gently so it does not dent or chip. Tape or stickers should not be put on the finish.
- For general care use a soft cloth to dust the furniture.
- Use damp cloth with a mild soap to clean-up spills or dirt. Dry the surface thoroughly.
- Please do not use any polishes, waxes or solvents to clean the surface of the furniture. This holds true for new Copeland Furniture pieces as well as items you may already have in your home.
- Please do not place any candles directly on the surface of your furniture. The perfumes and dyes in the candles may penetrate the finish.
- Beds must be disassembled before moving to avoid damage. Never attempt to move the bed while it is assembled.

How to Operate Extension Table Lock Mechanism

Tools required None

Locking locations

One leaf extension tables usually have two locking locations (*Figure 1*). The inner position is for locking the table when the leaf is unfolded (*Figure 1-2*). The outer position is for locking the table when the leaf is folded (*Figure 1-1*). Two leaf extension tables have three locking locations. Similar to the one leaf table, the inner locking location is for when leaf is folded, the middle locking position is for when one leaf is open, the outer locking location is for when two leaves are open.

Figure 1-1. Outer locking position when leaf folded

Figure 1-2. Inner locking position when leaf unfolded

How to lock/unlock the extension table

To release the lock, simply rotate the long handle (on the underside of the table) so that the short lock pin disengages from the friction plate (*Figure 2-1*).

To lock the table, rotate the long handle on the lock mechanism till the short lock pin engages with the friction plate (*Figure 2-2*).
